#docs/skin/README.md

The skin documentation. System Overview - Skin

About skin

Skin is the **layout** layer.

Installation
Server

Installation

It is recommended to use npm (http://npmjs.org) as the package manager.

To install all dependencies of skin with npm, from the skin directory that contains package.json, type:

```
#path-to-skin/npm install
```

Server

Starting the server (e.g. port 80, ip 127.0.0.1):

```
#path-to-skin/hem server -p 80 -host 127.0.0.1
```
